PROJECTS

Entertainment App

Entertainment App is a React-based project that serves as a convenient application for browsing and tracking movies and TV shows.
The app features a content library that allows users to discover their favorite films and series, add bookmarks, and navigate between different tabs and content cards.

Invoice App

The Invoice App is a tool designed to simplify your invoicing process. This app allows users to effortlessly create, delete, and edit invoices.

Audiophile

The project is a multi-page online store for audio equipment. Users can navigate to product pages, add items to their cart, and proceed to checkout.

Planet Facts

Planets Facts project dedicated to fascinating facts about the planets of our solar system. Here, you can discover captivating details about each planet, their unique features.
